

ALEXIS CORPORAL

San Pablo City, Laguna, Philippines 4000 • +63 945 468 1904 • corporal461@gmail.com

TECHNICAL SKILLS

Languages: TypeScript, Go, Python, C, JavaScript, SQL
Frameworks & Libraries: Next.js, React, Fastify, FastAPI, Flutter, Tailwind CSS, Raylib, OpenCV
Databases & Tools: PostgreSQL, MySQL, Docker, WebSockets, REST APIs, Git, Tesseract OCR, Linux
Testing & QA: Postman, JMeter

EXPERIENCE

Web Development Intern | Bakawan Data Analytics, Inc. Feb 2026 – May 2026

- End-to-end developed the PLSP Registrar DocsTrack platform, a multi-role document request system for Pamantasan ng Lungsod ng San Pablo.
- Built secure workflows with role-based access control (RBAC), WebSocket updates, and IP/user-agent audit logs.
- Tested API endpoints with Postman and ran performance tests using JMeter.
- Completed AWS Cloud Quest: Cloud Practitioner to understand cloud fundamentals.

PROJECTS

PLSP Registrar DocsTrack Feb 2026 – May 2026

Next.js, TypeScript, Go, PostgreSQL, WebSocket, Postman, JMeter

- Engineered a document request lifecycle app with payment tracking and real-time administrative status changes.
- Designed data analytics dashboards with integrated PDF/Excel document generation and export features.
- Hardened endpoint security with automated rate limiting, brute-force protection, and session audit tracking.

BakerPass Aug 2025 – Jan 2026

Next.js, TypeScript, Fastify, Flutter, MySQL, Docker, WebSocket

- Developed a multi-role appointment platform for Franklin Baker Company of the Philippines.
- Architected a high-care module requiring cross-functional nurse approval workflows and automated medical forms.
- Built a Flutter mobile application enabling real-time appointment booking and status sync.

OCR Drawing Extractor Feb 2026 – Jun 2026

Python, FastAPI, Tesseract OCR, pypdf, Tkinter

- Created a hybrid pipeline utilizing text-layer extraction for vector PDFs with automatic OCR fallback for scans.
- Optimized extraction processing speeds by developing an algorithm that skips graphics-heavy areas.
- Programmed an interactive GUI for custom region-of-interest selection and multi-page structured JSON export.

Soroban Solver Jun 2025 – Oct 2025

Python, OpenCV, OCR

- Built a math processing engine tracking screen captures from a connected Android device in real-time.
- Implemented adjustable OCR threshold controls, division modes, and localized CSV history logging.

GeoDroid Oct 2025

C, Raylib

- Programmed a classic vector-style Asteroids arcade game with smooth momentum physics and screen wrapping.
- Developed a persistent, file-based local leaderboard tracking top scores, player names, and date entries.

EDUCATION

Pamantasan ng Lungsod ng San Pablo — Bachelor of Science in Information Technology 2022 – 2026

- Graduated **Cum Laude**

ACHIEVEMENTS

- **Best Capstone Project** – Franklin Baker Visitor Management System (BakerPass), 2026
- **3rd Best Intern System** – PLSP Registrar DocsTrack, 2026
