ALEXIS CORPORAL

San Pablo City, Laguna, Philippines 4000 | +63 945 468 1904 | corporal461@gmail.com | github.com/Alexis12119

PROFESSIONAL SUMMARY

Full-Stack Developer and IT honors graduate (Cum Laude) with a strong foundation in building secure backend microservices, database schemas, and responsive applications. Awarded Best in OJT and Best Capstone Project for technical execution. A fast learner with a strong focus on workflow automation, process optimization, and data consistency. Proven track record deploying automated tools for industrial manufacturing, higher education operations, and small business operations.

TOOLS & TECHNOLOGIES

Languages: Java, Dart, TypeScript, Go, Python, JavaScript, SQL

Frameworks: Spring Boot, Next.js, Fastify, FastAPI, Flutter, Tkinter, Prisma ORM, Gorilla Mux

Infra & DB: Docker, Nginx, Vercel, PostgreSQL, MySQL, Supabase, WebSockets, Tesseract OCR

Tools: Postman, JMeter, IntelliJ IDEA, VS Code, Neovim, Git

WORK EXPERIENCE

Freelance Full-Stack Developer May 2023 - Present

- Designed normalized relational databases and software solutions targeted at institutional operations and local clinic business workflows.
- Built an automated inventory tracking tool featuring custom QR code generation and a transactional backend to maintain data consistency.
- Developed a mobile-friendly veterinary management system with role-based access control and local database synchronization.
- Created centralized web layouts with optimized browser asset handling to keep client side rendering fast.

Bakawan Data Analytics, Inc. Feb 2026 - May 2026

Web Developer Intern (Awarded 3rd Best System out of 9 teams)

- Worked closely with a software engineering team to translate core system blueprints into scalable web applications.
- Developed backend authorization components, including multi-tier user role validation and detailed event auditing logs.
- Tested API stability and backend request handling using automated test scripts in JMeter and Postman.

KEY PROJECTS

DLSP Registrar DocsTrack Feb 2026 - May 2026

Next.js, TypeScript, Go, PostgreSQL, WebSockets, Postman, JMeter

- Developed an online student document request and tracking application to replace manual record processing workflows for a university registrar's office.
- Implemented notification updates using real-time communication protocols to give users accurate visibility into their request status.
- Enforced data security and API reliability by writing customized request rate-limiting middleware and JWT authentication layers.

Digital Information Board Management System (DIBMS) Jul 2026

Next.js, TypeScript, Tailwind CSS, Prisma, Supabase, Vercel

- Built a web-based Content Management System (CMS) deployed on Vercel to manage and display weekly scheduling data across hardware monitors.
- Programmed an asset processing pipeline that handles multi-page PDF documents and converts them efficiently for client-side display.
- Engineered an automated scheduling script that dynamically updates public-facing boards according to localized time zones.

BakerPass Aug 2025 - Jan 2026

Next.js, Fastify, Flutter, MySQL, Nginx, Docker

- Created a web and Android visitor logging platform for a coconut manufacturing plant to log, track, and secure physical gate entries.
- Designed administrative validation flows with multiple authorization layers, including gate clearances for specialized facility zones.
- Configured self-hosted deployment architecture using Docker containers and managed incoming requests via Nginx proxy routing.

OCR Drawing Extractor Feb 2026 - Jun 2026

Python, FastAPI, Tesseract OCR, pypdf, Tkinter

- Developed a desktop utility using Tkinter to extract design metadata out of heavily detailed engineering blueprint documents.
- Improved character recognition accuracy by implementing coordinate-based spatial scanning and noise-reduction preprocessing.
- Optimized heavy extraction workloads by setting up parallel process execution loops to safely bypass language resource limitations.

EDUCATION

Dalubhasaan ng Lungsod ng San Pablo (DLSP) 2022 - 2026

*Bachelor of Science in Information Technology (Software Development Major) — **Graduated Cum Laude***

TRAINING & CERTIFICATIONS

- **Best in OJT & Best Capstone Project Awards** — Top Academic Performance in Software Development Major, 2026
- **AWS Certified Cloud Quest: Cloud Practitioner** — AWS Training & Certification, March 2026
