SUMMARY

IT graduate (Cum Laude) with hands-on experience building web and mobile apps. Skilled in database design, writing backend logic, and adding real-time features. Received Best in OJT and Best Capstone Project awards for delivering working software systems.

KEY SKILLS

- Web and Mobile Application Development
- Database Design & Normalization
- API Design & Testing
- System Logic & Process Automation
- Real-Time Features & WebSockets
- User Roles & Access Control

TOOLS & TECHNOLOGIES

Languages: Dart, TypeScript, Go, Python, JavaScript, SQL

Frameworks & Libraries: Next.js, Fastify, FastAPI, Flutter, Tkinter, pypdf

Databases & Tools: PostgreSQL, MySQL, WebSockets, Tesseract OCR

Testing & Infrastructure: Postman, JMeter, Nginx, Docker

WORK EXPERIENCE

Freelance Developer – Self-Employed (May 2023 – Present)

- Write code, build databases, and deploy web and mobile applications for local clients.

Web Developer Intern – Bakawan Data Analytics, Inc. (Feb 2026 – May 2026)

- Built a document request and tracking web app to replace a slow, manual paper process.
- Added secure features like user logins, real-time status updates, security checks, and activity logs.
- Tested how well the backend handles heavy traffic using JMeter and checked API endpoints with Postman.

SELECTED PROJECTS

DLSP Registrar DocsTrack (Feb 2026 – May 2026)

Technologies: Next.js, TypeScript, Go, PostgreSQL, WebSockets, Postman, JMeter

- Made a web app with live request tracking, automatic email alerts, a payment receipt upload feature, and options to export data to Excel and PDF files.

OCR Drawing Extractor (Feb 2026 – Jun 2026)

Technologies: Python, FastAPI, Tesseract OCR, pypdf, Tkinter

- Built a desktop script that extracts text layers directly from vector PDFs and uses OCR only on the headers and footers to mitigate image noise from blueprints.
- Created a simple interface where users can draw boxes on the screen to choose exactly which areas to read.

BakerPass (Aug 2025 – Jan 2026)

Technologies: Next.js, Fastify, Flutter, MySQL, Nginx, Docker

- Built a visitor management and health screening system with 6 different user roles to help secure factory entrance zones.
- Used WebSockets to instantly sync appointment bookings, health forms, and check-in steps across both web and mobile screens.

TRAINING & CERTIFICATIONS

- **AWS Certified Cloud Quest: Cloud Practitioner** – AWS Training & Certification, March 2026
- **Best in OJT** – Top rating among all BSIT Software Development Major students, 2026
- **Best Capstone Project** – Franklin Baker Visitor Management System (BakerPass), 2026

EDUCATION

Bachelor of Science in Information Technology (Software Development Major)

Dalubhasaan ng Lungsod ng San Pablo, 2022 – 2026 (Graduated Cum Laude)
